```
Void insert (node **head, int data)
{
        node   new = new node();
        new → data = data;
        new → next = * head;

        if (*head != NULL)
        {
                (*head) → next = XOR(new, (*head)→next);
        }
        *head = new;
```
